e)	Parks and Trails: Chair: Mary Johnson: Nothing to report	
f)	Water Stewardship: Chair: Don Henry: Update on NO RAIN TAX Grassroots Group: Clean Water, Clean Beaches Measure, Hauled Water: Feb 6, DH, MJ, Randy Alleman and Jeff Wheeler met with Phil Doudar of LA County Flood Control District and Edel Vizcarra of 5 th District, to discuss the unique attributes of Agua Dulce relative to the standards proposed in the CWCB measure. Mr. Doudar agreed that Agua Dulce does not fit the standards for the fee methodology used for commercial businesses. We have a much larger percentage of impervious surface. He agreed to allow a fair appeals process if the property owner could prove his surface was at a minimum of 10% difference than the standard. He stated the "direct" benefits to the property owner would be 1) improved public health, 2) possible capture of water within the Santa Clara River bed to improve our water storage, and 3) protection of fines for non-compliance. Based on the interpretation of Prop 218, the measure does not meet the requirements of a "fee." Land classifications may change from residential to agricultural or horse ranch increasing the multiplier. Models are based on "worse case" scenario in an urban setting. Since this has not been finalized in an ordinance, instead of allowing an appeals process, they should go back to the drawing board and fix the "anomaly" on a parcel by parcel basis.
